# Draft Thematic Framework for the 6th World Water Forum

## CREATE A BLUE MOVEMENT !

3 strategic directions

12 key priorities for water action:

Ensure every one's well being  
Contribute to economic development  
Keep the planet blue

- Guarantee access to water services for all and the Right to Water
- Guarantee access to integrated sanitation services for all
- Contribute to improved hygiene and health through water
- Protect populations and economies from risks
- Contribute to cooperation and peace

- Balance multiple uses
- Ensure food security
- Harmonize energy and water
- Protect and value ecosystem services and green growth

- Improve the quality of water resources and ecosystems
- Adjust pressures and footprints of human activities on water
- Respond to climate and global changes in an urbanizing world

Conditions for success

- Good governance
- Finance water for all
- Enabling environment

« La Lettre du RIOB »  
« INBO Newsletter »  
N°20  
December 2011

**La lettre du RIOB**

**S'adapter aux conséquences du changement climatique**

Le changement climatique apparaît désormais inéluctable. Une des premières conséquences en sera une modification des cycles hydrologiques.

Les ressources en eau douce en seront directement affectées de la même manière, avec pour conséquences, notamment, et selon les régions:

- des perturbations dans l'intensité et dans la fréquence des inondations et de sécheresses,
- une déségulation des débits des fleuves prenant leur source en montagne, du fait de la fonte des glaciers et de la réduction de l'enneigement,
- une dessèchement des rivières,
- une plus grande fréquence des crues,
- une modification de la répartition spatiale et temporelle des précipitations.

Les conséquences sont très importantes. Cette nécessité est au cœur de la 8<sup>ème</sup> Assemblée Générale de l'INBO, qui se tiendra à Paris le 23 janvier 2012.

[www.riob.org](http://www.riob.org)

**La carta de la RIOC**

**Adaptar a las consecuencias del cambio climático**

El calentamiento global ya no se puede evitar. Una de las primeras consecuencias será una modificación de los ciclos hidrológicos.

Los recursos de agua dulce se verán afectados directamente en los años venideros, con consecuencias en particular, y según las regiones:

- alteraciones en la intensidad y frecuencia de las inundaciones y sequías,
- desregulación de los caudales en los ríos que nacen en las montañas, debido a la fusión de los glaciares y a la reducción del manto de nieve,
- una mayor frecuencia de las crecidas,
- una fuerte reducción de los niveles de las riberas,
- modificaciones de la distribución espacial y temporal de las precipitaciones.

Las consecuencias son muy importantes. Esta necesidad es el eje central de la 8<sup>ª</sup> Asamblea General de la INBO, que se celebrará en París el 23 de enero de 2012.

[www.rioc.org](http://www.rioc.org)

**INBO Newsletter**

**Adapting to the consequences of climate change**

Global warming now seems to be unavoidable. One of the first consequences will be a change in the hydrological cycles.

Freshwater resources will be directly affected in the coming years, with for consequences, in particular and according to the regions:

- changes in the intensity and frequency of floods and droughts,
- modification of the flows of rivers coming from mountains, because of the melting of glaciers and reduction of the snow cover,
- increased erosion caused by the modification of plant and soil cover,
- higher plant evapotranspiration leading to changes in agricultural production, regarding irrigation in particular,
- changes in the flows to the river mouths, as well as salt water intrusion inland and in coastal aquifers, because of the increase of sea and ocean level.

The demographic, economic and ecological consequences are likely to be very important and require a worldwide mobilization to quickly prepare the adaptation programs necessary in each river basin.

This necessary adaptation to the effects of climate change on the hydrological cycles will be at the core of the work of the next 8<sup>th</sup> World General Assembly of INBO, which will be held in Paris (France) from 23 to 25 January 2012, at the invitation of the Organization for the Development of the Senegal River (OMVS).

Register now to participate!
