- EIC General Assembly in in the frame of the Spanish Congress of Irrigators Communities .Tarragona , 14 may 2010
  
- **MORE COLLABORATIONS IN THE FUTURE!!**

# Importance of the Irrigators Communities

- Irrigators Communities are Public Law Corporations , assigned to the River Basin Districts
- They are a grouping of all the owners of an irrigation area and the other water users, which bind to common and public self-government of waters in a non-profit way.
- They permit management and distribution of water for irrigation and the other water users.
- The norms on water distribution are based on the Common Law.

# Objectives of Irrigators Communities

---

- o Distribution and regulation of granted waters, binding to the norms sanctioned by Public Authority and elaborated by the users themselves.
- o Existence of common properties and related equipment, such as:
  - Water (generally with one or several common outlets).
  - Transport and distribution hydraulic networks.
  - Right-of-ways caused by the works.

# Advantages of the irrigation administrative management in Irrigators Communities

---

- 1. Independence. The Irrigators Communities must be politically independent.**
- 2. Versatility and flexibility of its structure and operation, able to adapt to different types of irrigation:** traditional or new ground or surface waters, an abundance or scarcity of resources
- 3. Irrigators Communities do a great job for the Civil Service, managing and pacifying the water use.**

# Advantages of the irrigation administrative management in Irrigators Communities

---

4. The nature of the Communities of Irrigators as **Corporations of Public Right** is a kind of prolongation from the Water Bodies to the users.
5. **Allow users to participate** in governing bodies, management and participation of the River Basin assuming responsibility.
6. **Make easier the collection** of the operational and exploitation water costs for the Government.

# Advantages of the irrigation administrative management in Irrigators Communities

---

7. **Control and limit the abuses in the use and administration of water under the control of the Community which watch over the general interest.**
8. **Allow law enforcement to the daily management of water**
9. **Make easier water management, distributing equitably, and pacifying the water use.**
10. **Flexible, open and democratic Model.**

# The institutional organization of the Irrigation on the world

# Australia and North America

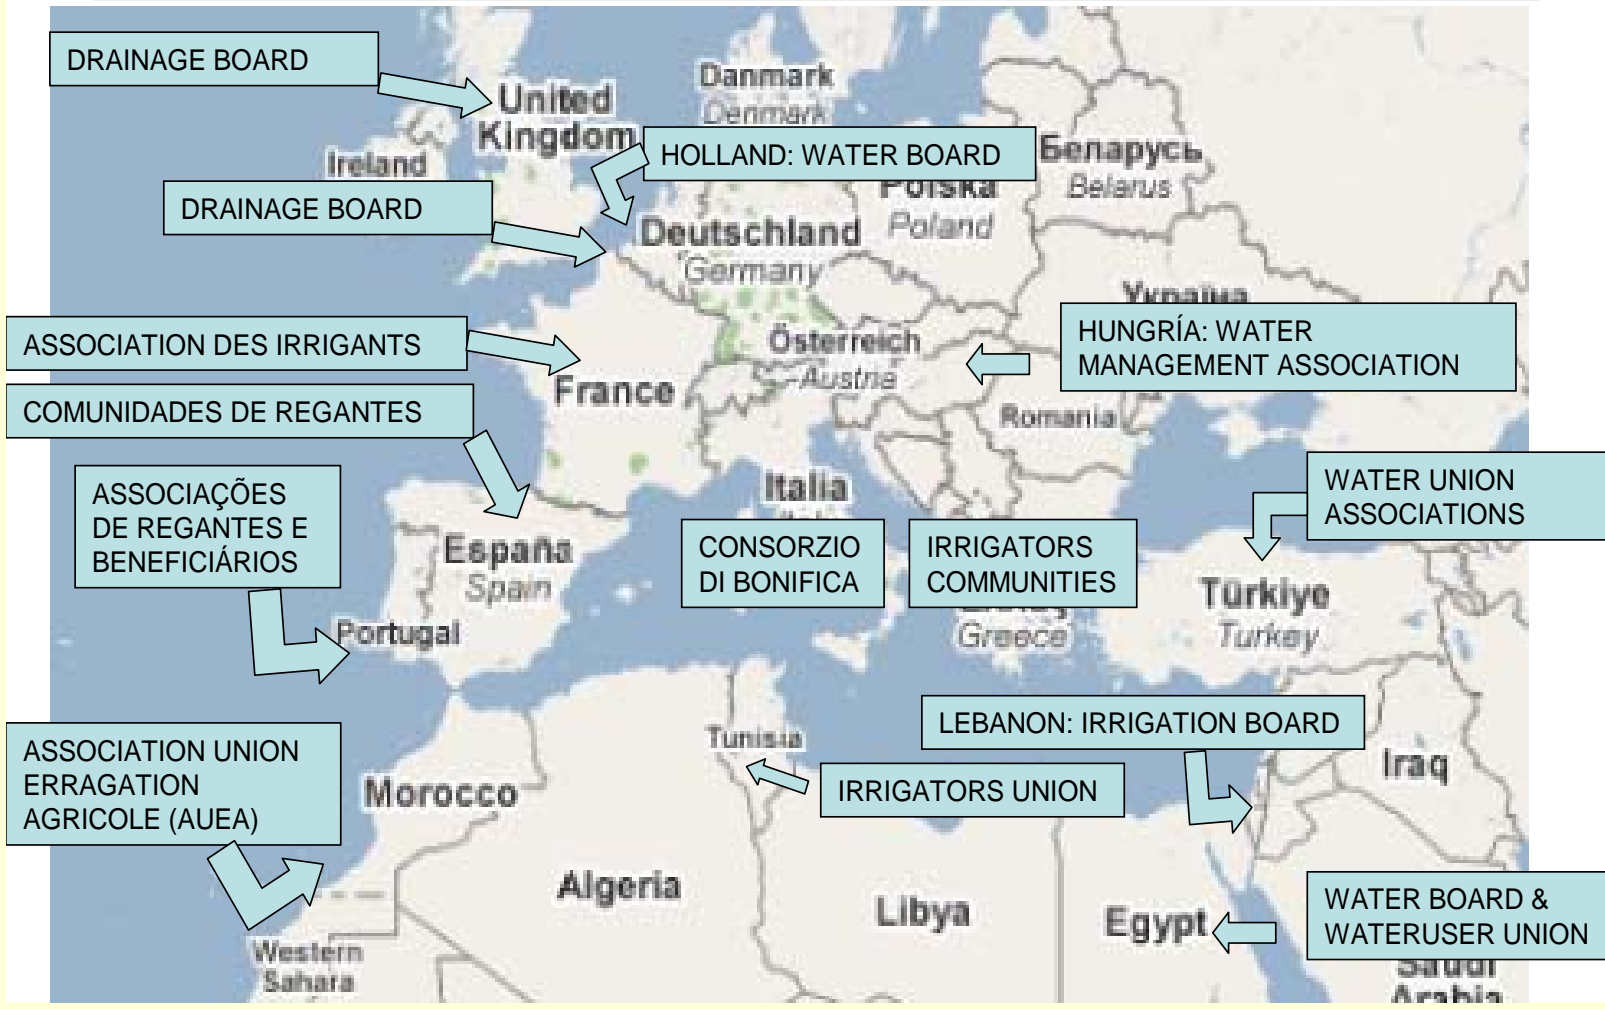

# Central America

# South America

# Europe and North Africa

# Asia

**Thank for your attention**
