

Challenges and solutions for climate change adaptation in Mexico

Mr ROBERTO Ramírez de la Parra

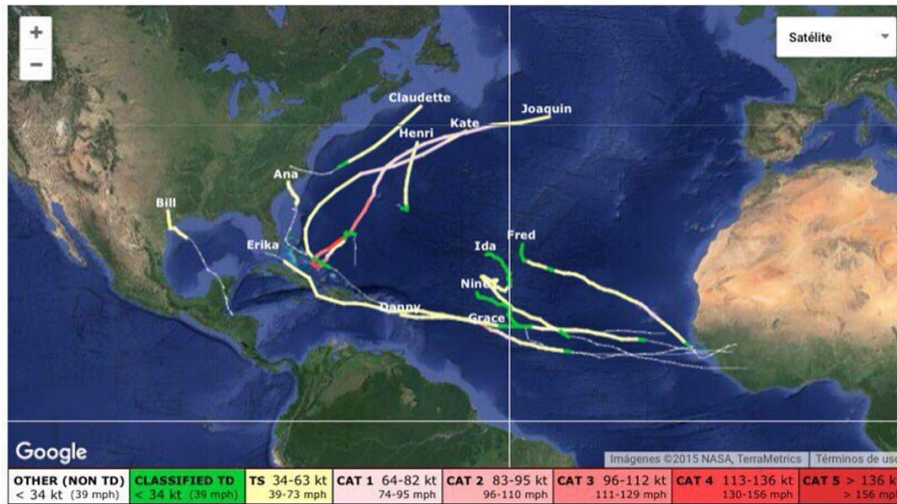

Water Situation in Mexico

PATRICIA

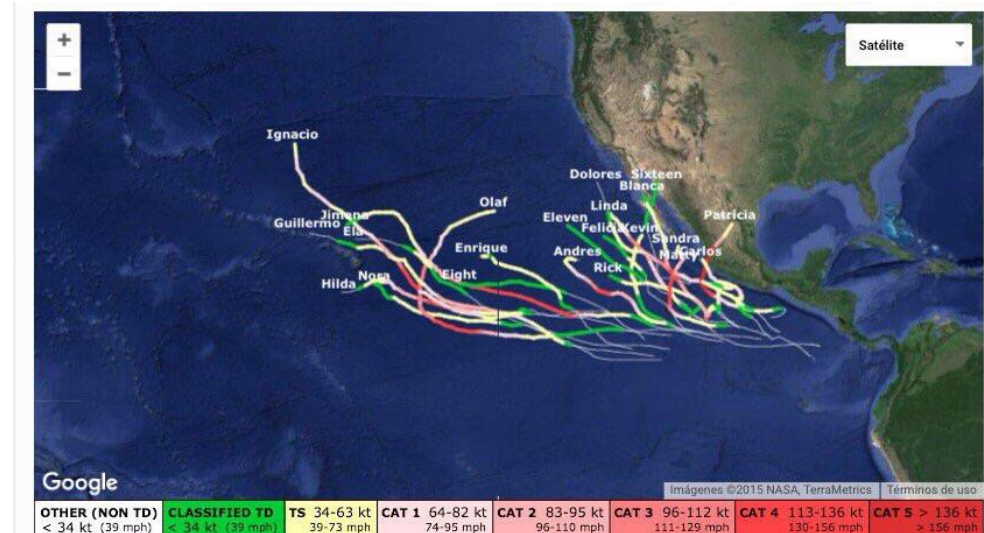

worst drought
strongest hurricane ever
recorded

Mexico's geographical location determines water distribution

Hurricanes (Atlantic Ocean)

Hurricanes (Pacific Ocean)

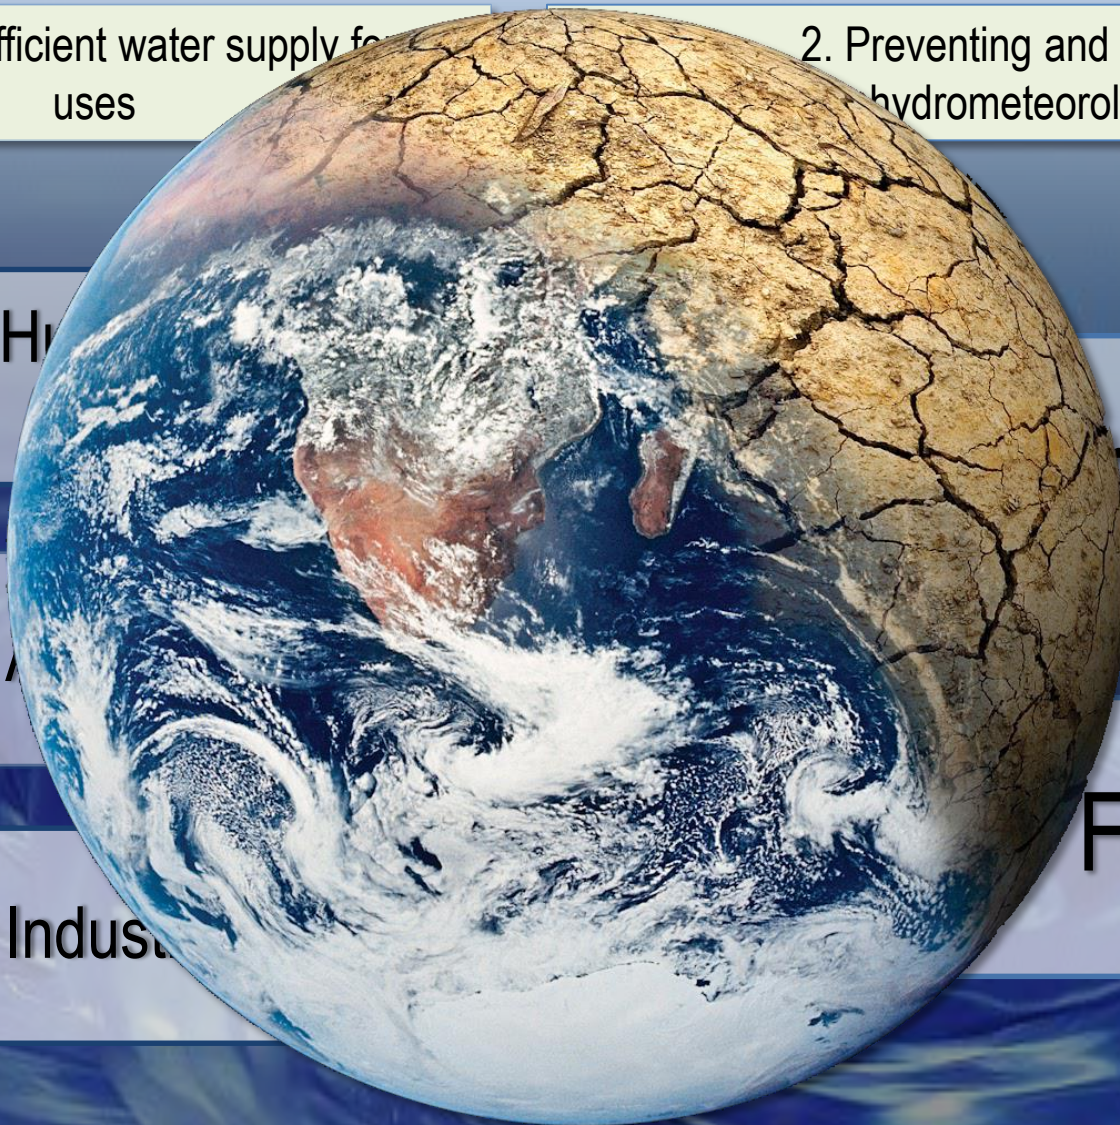

Two Major Challenges

1. Ensuring sufficient water supply for
uses

2. Preventing and mitigating
hydrometeorological risks.

Hi

A

Indus

droughts

Floods

1. Ensuring sufficient water supply for all uses

We promote the construction of treatment plants

We urge desalination

2. Preventing and mitigating hydrometeorological risks
