

Invitation Letter

Dear Dr. Jean Francois Donzier,

On behalf of 2013 Euro-Asia Economic Forum (EAEF-2013) Organizing Committee, we cordially invite you to join the 3rd New Energy Forum-2013 with the theme of "From Green Dream to Reality", which is one of the most crucial parallel meetings of EAFE-2013, during September 26-28, 2013, at Xi'an Qujiang International Conference Center, China.

Climate change and a growing demand for clean energy are opening up new business opportunities. New energy sources like solar, wind, hydrogen and certain types of biomass are critical to our energy future because they are naturally replenished and therefore sustainable. New energy is one of the most exciting growth areas in the energy market.

The aim of NEF-2013 is to provide a world-class meeting to exchange information and promote the new energy industry, and to differentiate the summit from other conferences by covering more comprehensive issues from both public and private sectors regarding the sustainable or renewable energy. This time we compact the program and coloring topics. The preparations for NEF 2013 have highlighted nine areas which need priority attention, including solar energy, wind energy, nuclear energy, ocean energy, hydrogen energy, geothermal energy, biomass energy, energy storage & smart grid and other new energies. We also hope such an initiative can meet the challenges and demands facing to the society in developing practical solutions under international standards to support new energy development. Meanwhile we will offer a universal platform of scientific and technical communication for decision makers, researchers, industrial participants, business leaders and so on. NEF will provide new business development with opportunities to learn from others' experience in this field; identify ways to play an even more active role in promotion of sustainable or renewable energy and seize further green investment opportunities for innovators and entrepreneurs worldwide.

Lastly, we hope that you could show your enthusiasm and make contributions to this event and enjoy your stay in Xi'an. We are sure that you will have an unforgettable experience in NEF-2013.

Xiaodan Mei, Ph.D.
Executive Chair
President of BIT Congress Inc., China
